*Sutera/Bacopa-Snow Storm*

**'Snow Globe' and 'Blue Imp'** Common name: 'Spillovers'

*Sutera/Bacopa hybrid*

#### KEY BENEFITS

'Snow Globe' and 'Blue Imp' are plant that spills over pots, baskets, gardens and balconies. Flowers are numerous, it is almost impossible to see any of the green leaves of the plant. Ideal in mixed plantings in part sun to sunny situations. Unlike most plants *Suteras* will not wilt when drought stressed. Before the plant shows signs of wilting it will drop both flowers and buds from the plant. A good idea is to plant 'Snow Globe' and/or 'Blue Imp' with a plant that shows wilting such as PW selection like *Solenostemons*. If they wilt water the container immediately.'

#### ORIGIN

*Suteras* and *Bacopas* come from different countries. *Sutera* are from Southern Africa and *Bacopas* are from the Gulf States of the USA. Breeders have selected from these to use in cross breeding. From the seedlings, selected varieties are brought to the market for gardeners. Many outstanding selections have made their way into nurseries over the years. 'Snow Globe' is a standout from the pack being so showy and so easy to grow. 'Blue Imp', a bright blue with a golden eye makes a good colour feature.

#### USES

For the best in cover plants in massed plantings plant 'Snow Globe' and/or 'Blue Imp' in the container or garden bed when the main garden is planted. *Suteras* do not easily smother other key plants, they are not rampant in growth and one can always prune. They grow and cover the potting media spilling over the edges of the pot or the garden wall if in elevated beds, a great solution.

#### CARE

It is a fact that many of the flowering plants from the Proven Winners selections are fast growers. Consequently they need attention to watering and fertilising. As the arrangements grow some pruning to shape is necessary to get the design needed as the plants develop. It is at this stage, be it fortnightly or monthly that general needs for fertiliser need attention. Slow release fertilisers are ideal as they release nutrients regularly, however if using liquid fertiliser add it regularly, more so as the planter grows. 'Snow Globe' and 'Blue Imp' give a finishing touch to your ideal garden planters.

Another super selection from the team at Proven Winners.
